Scott will talk about Wilderness Landscape Photography: Tips, Techniques, and the Stories behind some of his favorite photographs.

This seminar is developed for everyone, regardless of how much experience you have in photography. People on all levels should be able to learn something that they can head out and use right away. There will be question and answer on all topics. We hope you can come.

Scott grew up in the beautiful southern Appalachian mountains of western North Carolina. He is a self-taught nature photographer, specializing in wide-angle, dramatic photographs of the natural landscape.

Scott spend a vast amount of his time in the field experiencing, studying and most of all enjoying the areas that we still have. In today's fast-paced society of growth and expansion, the wilderness is always on the losing side of the equation. Scott wants people to see his photographs and remember the world around them. He want to inspire them to care about and conserve the wild landscape before it's too late.
